

Arizona Interagency Radio System (AIRS) Narrowbanding Status

Presentation to

SIEC

Scott Tillman, Wireless Systems Engineer

AZ Department of Public Safety

October 19, 2010

- The Department of Public Safety (DPS) will begin Narrowbanding AIRS in July of 2011.
- Early tests have shown that narrowbanded LMRs and base stations can operate using widebanded AIRS repeaters within tolerable limits of clarity and distance.
- DPS has indicated that county and local agency narrowbanding efforts can proceed without having to synchronize schedules with DPS. This approach will save time and inconvenience for all concerned.
- The schedule for AIRS narrowbanding is TBD.

Questions Discussion
